

Szymon Chodźdło

Software Engineer

SUMMARY

A software engineer with 9+ years of experience in creating scalable web applications with Ruby on Rails, Vue.js, and TypeScript. Adept at Agile methodologies and experienced in guiding cross-functional teams to deliver exceptional software products.

EXPERIENCE

j-labs sp. z o.o. Senior Software Engineer

December 2024 - April 2026 (1 year 5 months)

- Maintained and improved complex legacy systems, ensuring stability while continuously enhancing code quality through refactoring.
- Diagnosed and resolved production issues, delivering reliable performance and a smooth user experience.
- Designed, implemented, and tested new features, proposing scalable solutions aligned with evolving business needs.

Railwaymen sp. z o.o. Senior Software Engineer

June 2018 - November 2024 (6 years 6 months)

- Designed and developed advanced software solutions for the financial, healthcare, education, food, and construction sectors.
- Collaborated directly with partners and clients to define optimal architectures and technical approaches to address business challenges.
- Led a team of five engineers in building a scalable, cloud-based platform for the daily collection, processing, and management of financial data.
- Mentored junior developers and elevated team coding standards through best practices and code reviews.
- Strengthened test coverage by implementing and maintaining comprehensive unit, integration, and end-to-end testing strategies.

MNS Lab sp. z o.o. Junior Ruby on Rails Developer

November 2017 - April 2018 (6 months)

- Developed a simple REST API for an ecological application to collect, transform, and expose time series data from renewable energy sources
